# Junior Web Application Engineer

## Tracking Code

2015187

## Job Description

The SUSE DevOps Team is responsible for producing the Open Build Service and SUSE Studio, two powerful Web Applications. We are interested in hiring a Junior Web Applications Engineer to work on these exciting and critical applications. Customers, partners, collaborators, and SUSE employees use these tools day in and day out to create Linux solutions.

### Who we are:

- \* We are an international team of developers responsible for the full-stack development of Open Build Service and SUSE Studio
- \* We develop and manage our applications using DevOps practices, with automated testing, and frequent (but deliberate) deployment
- \* We highly value Agile development, with test-driven development, code reviews, and scrum-like characteristics in our day-to-day work
- \* We're a growing team, providing valuable solutions to our users, while absorbing new techniques and technologies
- \* We highly value satisfied customers

### Desired skills:

- \* Some visual design skills with sensitivity to user-system interaction
- \* Understanding of web technologies like HTML5, CSS3, and JavaScript
- \* Some experience with web tools and frameworks such as Ruby on Rails, Node, Rspec, Haml, etc.
- \* Experience with Linux (We're a Linux company, after all)
- \* Able to understand and contribute to sophisticated web projects
- \* Someone who is more interested in solving customer problems than marriage to any particular toolset or framework
- \* A person who wants to work in an agile environment, collaborating effectively with a variety of others, but also who works in a self-motivated way
- \* Must be willing to learn to maintain existing code in addition to developing new capabilities
- \* Make use of continuous integration and write automated unit and integration tests for your code
- \* Surely someone who can code, but who also cares about quality, deployment, and continuous improvement
- \* You are passionate about creating excellent software solutions
- \* And you need to be willing to have fun, grow, learn, and help others to do the same!

### Our Offer:

- \* Join our English-speaking team in the Nuremberg Germany SUSE office (help with relocation is available)
- \* Work with a well-maintained codebase, with lots of room to grow
- \* 28 days of vacation
- \* Contributions to pension insurance or capital life insurance
- \* Other common employee benefits (food coupons, health care, sports and cultural activities, free fruits and beverages)
- \* Our team celebrates the reach of milestones together

### How to apply:

- \* Submit your curriculum vitae (CV) or resume, including a cover letter telling us who you are and why this job at SUSE is for you.
- \* If you've done any previous open source work, tell us about it
- \* In order to get to know you better please point us to some code you've written, or tell us about a software project you care about and explain your involvement
- \* Please provide everything in one pdf to make our HR system happy!

### Job location:

Nuremberg Germany, or Prague Czech Republic

\*LI-RA1

## Job Location

Nürnberg, , Germany
